

ASA-OK Membership Benefits

ASA is the only association – national, state or local – dedicated solely to improving the business environment for subcontractors and suppliers in the construction industry. By focusing exclusively on subcontracting, ASA can target the issues that most impact your bottom line.

We provide professional development, networking, education and resources to help you run your business more profitably. Here are just a few of the reasons we think you should renew your membership:

Advocacy

We offer a united voice and representation for subcontractors at the local, state, and national levels. Legislators and decision-makers hear your point of view on issues that affect business conditions for subcontractors. Your voice and participation will help increase our power.

Monthly education events and professional development

Designed with you and your business in mind, our monthly member lunches cover business topics that are tailored to your business and helping you be successful.

Online resource library

The ASA-OK website and national ASA website are full of educational resources, like contract documents and negotiation tips to help you build a better business.

Association worker's comp plan

The Oklahoma Chapter is proud to offer an endorsed Workers Comp Program through Comp Source Mutual Insurance Company. A 5% rate reduction will be applied to workers compensation premium for qualified members. (For many members, the discount creates more than enough cost savings to recoup their yearly membership dues!)

Office space at ASAOK HQ

Your membership gives you access to a dedicated office space at the ASA-OK headquarters to host trainings or meetings.

Networking opportunities

Our monthly member lunches are a great way to connect with other construction business leaders like you. We also host events that help you meet and socialize with GCs to grow your business.

News and industry development

We're a trustworthy source of up-to-date information about issues that could potentially affect your business.
